| Emergency Duty Roster: Contact: | Posted on the SA ICU board and E/CC Rotation Schedule Ramona Andersen, 3-3157 |
| Special Clothing Needed: | White Lab Coat Professional attire |
| Instruments or Special Equipment Needed: | Stethoscope and calipers |
| Comments or Special Instructions: | Cardiology receives patients on Tuesday, Wednesday and Thursday morning in general. Special appointments may be made on Monday and Friday. Monday is a procedural day whereby patients are treated for disorders that require fluoroscopy. Students observe such procedures as pacemaker implantation, atrial fibrillation cardioversion, PDA occlusion or balloon valvuloplasty. Students should always have reading material available on procedural days. On Friday we have special appointments, extended rounds, or echocardiographic practice time directed by the students. We generally have rounds from 9:00 am until 9:45 am. The latter is the time that our appointments begin. Please do not bring personal items to the cardiology room (e.g. backpacks, lunches, coats). There is no room for these in the room and we will have to ask you to store them elsewhere. Thank you. |

We look forward to you have an excellent learning experience!
