Faculty Position in Dentistry and Oral Surgery

The Department of Clinical Sciences in the College of Veterinary Medicine at Cornell University invites applications for a tenure track or clinical track Dentistry and Oral Surgery faculty position in the Section of Dentistry and Oral Surgery. This expansion of the Section will result in a total of two dentists with the goals of supporting robust pre-clinical and clinical research programs, providing excellent dentistry and oral surgery services in the Hospital, and maintaining a strong teaching and outreach program. The successful candidate will join a current faculty of one board-certified dentist supported by one experienced, licensed technician, and one Dentistry and Oral Surgery resident in a comprehensive, state-of-the art teaching and referral hospital. The Cornell University Hospital for Animals is equipped with extensive therapeutic and diagnostic equipment including a dedicated dentistry suite, rigid and flexible video-endoscopy, Ho-YAG, CO₂, and diode lasers, flat-panel C-arm for intra-operative imaging, 1.5 tesla MRI, 16-slice CT, nuclear imaging, intraoperative ultrasound, and a linear accelerator.

Candidates must have a DVM or equivalent degree. Board certification in veterinary dentistry (AVDC) is preferred, but candidates who have recently completed an approved residency and are board eligible in veterinary dentistry will also be considered. Basic science and translational research experience is desirable and candidates with advanced degrees are encouraged to apply. Clinical expertise in large animal dentistry is desirable but not required.

Distribution of effort in the section and department will be determined in accordance with the service needs, academic priorities, and the candidate’s expertise and academic goals in Dentistry and Oral Surgery. Clinical teaching and service in the Cornell University Hospital for Animals, lecture and laboratory instruction of veterinary students and house officers, and independent and collaborative research expectations are expected consistent with the appointment. Extensive opportunities for collaborative research exist at the College and University, including Mechanical Engineering and Bioengineering and Nanotechnology units on the Ithaca campus and the Weill-Cornell Medical College and new technology campus in New York City.

Clinical duties require flexible working hours that may include evening and weekend responsibilities. The candidate should have strong interpersonal skills and the ability to work cooperatively with all of the Sections in the Hospital.

Salary, rank and title will be commensurate with academic credentials and experience.

Cornell University embraces diversity and seeks candidates who will create a climate that attracts people from all races, nationalities and genders. We strongly encourage underrepresented minorities to apply. The University seeks to meet the needs of dual career couples and has a Dual Career Program to assist with dual career searches.

Cornell is located in Ithaca on the shores of Cayuga Lake in the beautiful Finger Lakes region of New York. Ithaca is a vibrant city with many art museums, theaters, and a diverse selection of restaurants. It is within driving distance of several large metropolitan centers, award-winning wineries, and downhill skiing areas. Ithaca is a nature-lovers paradise with ample opportunity for hiking, camping, horseback riding, swimming, sailing, bird watching, snowshoeing, and cross-country skiing.

Electronic application submission is through Academic Jobs Online: https://academicjobsonline.org/ajo/jobs/3264.

The required sections of the application include a cover letter describing your research interests, teaching philosophy and clinical interests, curriculum vitae, and email addresses for letter requests of 3 referees who will be invited to upload their letters at this site.

Review of applications will begin on February 15, 2014, and continue until the position is filled.
