

The College of Veterinary Medicine, Cornell University, announces an exciting opening for a Fellowship in Veterinary Anesthesiology. The Fellowship program consists of a two-year appointment that combines clinical veterinary anesthesiology and an innovative research program in the area of equine anesthesia recovery. This program invites applications from faculty seeking to develop post-residency experience in tertiary clinical service, and research expertise in the area of equine anesthesiology. The successful applicant will have a DVM, or an equivalent qualification, and have completed a residency in veterinary anesthesiology. Diplomate status by the ACVAA or ECVAA is preferred.

The position is focused on supporting the clinical, educational, and academic missions of the Section of Anesthesiology and Pain Medicine at Cornell University. In this position, responsibilities will be divided into two main areas: clinical service (small animal, and equine/farm animal hospital), which will be shared with a team of 5 board certified veterinary anesthesiologists, 4 residents, and 11 LVTs (4 with anesthesia VTS). The second main area involves active participation in an externally funded research project aimed at improving the safety in equine anesthetic recovery. Along with the other members of the anesthesia team, participation in academic activities at the College and University including seminars, rounds, and section meetings would be encouraged.

Cornell University is an Affirmative Action, Equal Opportunity Employer and Educator.

Electronic application submission is through Academic Jobs Online (AJO):
