Faculty Position in Cardiology

The Department of Clinical Sciences in the College of Veterinary Medicine at Cornell University invites applications for a tenure track Cardiology faculty position in the Section of Cardiology. This will result in a total of two tenure-track cardiologists, one part-time cardiologist and a visiting cardiologist in support of the electrophysiology program with the goals of engaging in robust pre-clinical and clinical research programs, providing excellent cardiology services in the Hospital, and maintaining a strong teaching and outreach program. The successful candidate would join a section supported by 2 licensed technicians (LVT), and two cardiology residents in a comprehensive, state-of-the art teaching and referral hospital.

The Cornell University Hospital for Animals is equipped with extensive therapeutic and diagnostic equipment including a Philips Epic 7 echocardiographic imaging system with transthoracic three-dimensional transducers and two-dimensional pediatric transesophageal probe, one electronic electrocardiograph, in-house Forest Medical Holter system, Ziehm C-Arm fluoroscope, Toshiba Aquilion Large-Bore 16-slice Computed Tomography unit, Medtronic LifePak defibrillator, and Workmate Claris St. Jude system equipped with EP-4 Cardiac stimulator and Ampere radiofrequency generator for electrophysiology and hemodynamic signal acquisition, pacing and radiofrequency ablation. Moreover, we are planning the construction of a state-of-the-art interventional radiology suite, and adding an Abbott Ensite System to perform high-density electroanatomic 3-D mapping as part of the expansion of the cardiac electrophysiology program.

Candidates must have a DVM or equivalent degree. Board certification in veterinary cardiology (ACVIM or ECVIM) is preferred but candidates currently enrolled in cardiology residency training programs are welcome to apply. Clinical and/or basic science research experience is desirable.

Distribution of effort in the Section and Department will be determined in accordance with the service needs, academic priorities, and the candidate's expertise and academic goals in cardiology. Clinical teaching and service in the Cornell University Hospital for Animals (companion animals, equine and farm animals, exotics), lecture and laboratory instruction of veterinary students and house officers, and independent and collaborative research expectations are negotiable. Extensive opportunities for collaborative research exist at the College and University, including Weill Medical College and technology campuses in New York City.

Clinical duties require flexible working hours that may include daytime, evening, and weekend responsibilities. The candidate should have strong interpersonal skills and the ability to work cooperatively with all of the sections in the Hospital.

Salary, rank and title will be commensurate with academic credentials and experience.

Cornell University embraces diversity and seeks candidates who will create a climate that attracts people from all races, nationalities and genders. We strongly encourage underrepresented minorities to apply. The University seeks to meet the needs of dual career couples and has a Dual Career program to assist with dual career searches.

For more information, go to: <http://www.vet.cornell.edu/clinsci/> or contact Dr. Romain Pariaut, Chair of the Search Committee at rp223@cornell.edu.

Electronic application submission is through Academic Jobs Online:
<https://academicjobsonline.org/ajo/jobs/19407>.

The required sections of the application include a cover letter including statement of career goals; curriculum vitae; statement of teaching philosophy and goals, research interests and plans, and inclusion and diversity; and email addresses for letter requests of 3 referees who will be invited to upload their letters at this site.

What is a Statement of Contribution to Diversity?

A statement invites applicants to describe their past, present, and/or future aspirations to promoting equity, inclusion, and diversity in their careers as researchers and educators, and/or to convey how they see these commitments continuing at Cornell. Such articulation can focus on teaching, research, or service, or all of three factors.

Review of applications will begin on September 21st, 2021, and continue until the position is filled.
