

EQUINE IMMUNOLOGY LABORATORY

Immunologic testing for horses (2021) – NEW FEES:

Please check the test being requested:

_____ Peripheral blood lymphocyte phenotyping	\$ 130
required sample: 20ml FRESH* whole blood purple top EDTA <u>or</u> green top heparin	
_____ Serum immunoglobulin concentration (IgG)	\$ 45
required sample: 5ml <u>serum</u> red top **	
_____ Serum immunoglobulin concentration (IgM)	\$ 55
required sample: 5ml <u>serum</u> red top **	

*** ATTENTION: whole blood samples with hemolysis or older than 2 days are not suitable for testing**

** if both IgG and IgM are being requested, 5ml serum red top is enough for both tests

There is NO need to separate plasma or serum from samples.

We are processing samples only on **Tuesdays, Wednesdays** and **Thursdays**. Holiday schedules apply (see website for more information www.vet.cornell.edu/labs/EquineImmuno). Please let us know ahead of time when samples are expected (e-mail mbf6@cornell.edu).

Please send samples to the **address below only**, overnight shipping, **morning delivery**, with an ice pack. If weather temperature is below freezing, send samples in a thick Styrofoam box (frozen samples are not suitable for testing).
