

**Cornell Companions Health Screening Form For small animals (dogs and cats) Page 1 of 3**

To be eligible to participate in Cornell Companions all animals must be examined by a licensed Veterinarian and pass all parts of the health examination.

If your animal has been examined within the last **12 months** and it included ALL parts of the Cornell Companions health screen you do not need to schedule an additional examination, **but** your veterinarian must still sign this form.

To remain an active member of Cornell Companions you will need to provide documentation of current rabies vaccination whether this be every year for those receiving annual vaccines or every 3 years for those on 3 year vaccination schedule.

This form has been formulated with the assistance of licensed and well established veterinarians in the community and the requirements are considered important as you are sharing your animals with members of the public, some of whom may have serious health conditions that compromise their immune system. It is desirable that your animal receives a yearly wellness examination by your veterinarian.

**For Dogs and Cats**

PLEASE NOTE: Animals that eat a raw protein diet or treats **CANNOT** be part of Cornell Companions.
